FRONT WEIGHT ASSEMBLY

MODEL

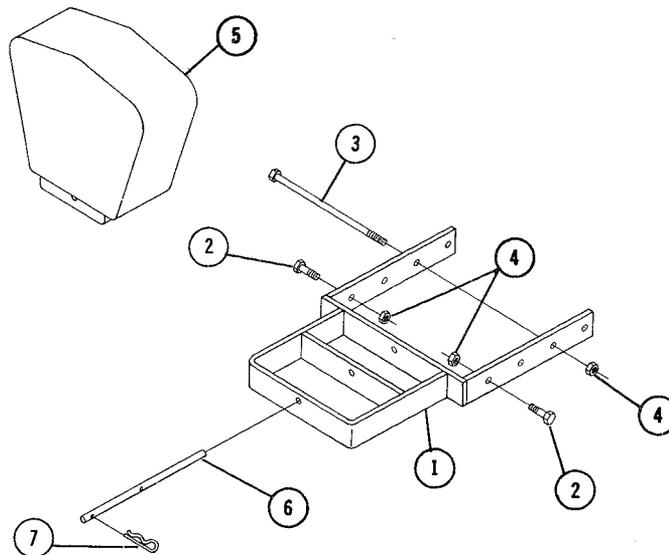

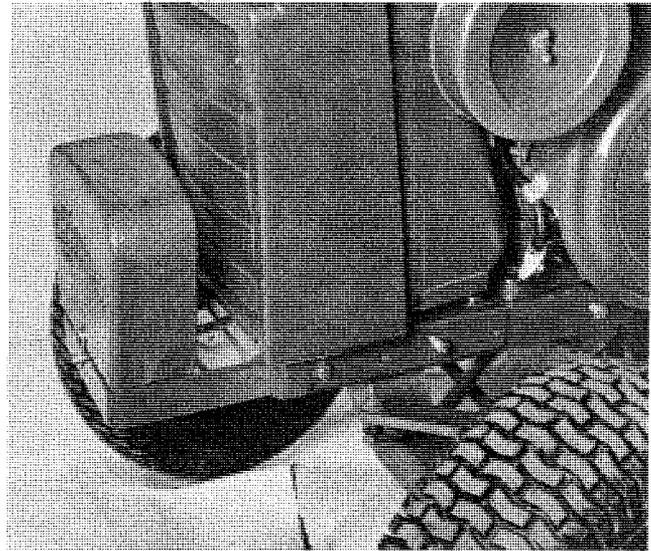

8-1221

DESCRIPTION

This front weight accessory is designed to mount to the front of the tractor. It is used on all tractor models that have a 8" wide frame. It is to be used for improved tractor stability when heavy attachments are hitched to the rear of the tractor. The basic accessory is provided with one fifty pound weight, but is designed to hold two weights if required for additional stability.

ASSEMBLY

Mount the weight carrier to the tractor frame aligning the first and second hole of the tractor frame with the first and third hole of the carrier for one weight use, as shown in photo, or second and fourth carrier holes for two weight use. Slide the pin through the carrier in the carrier and weights, install the two hairpin cotter pins.
